Connecting Onshore to Offshore

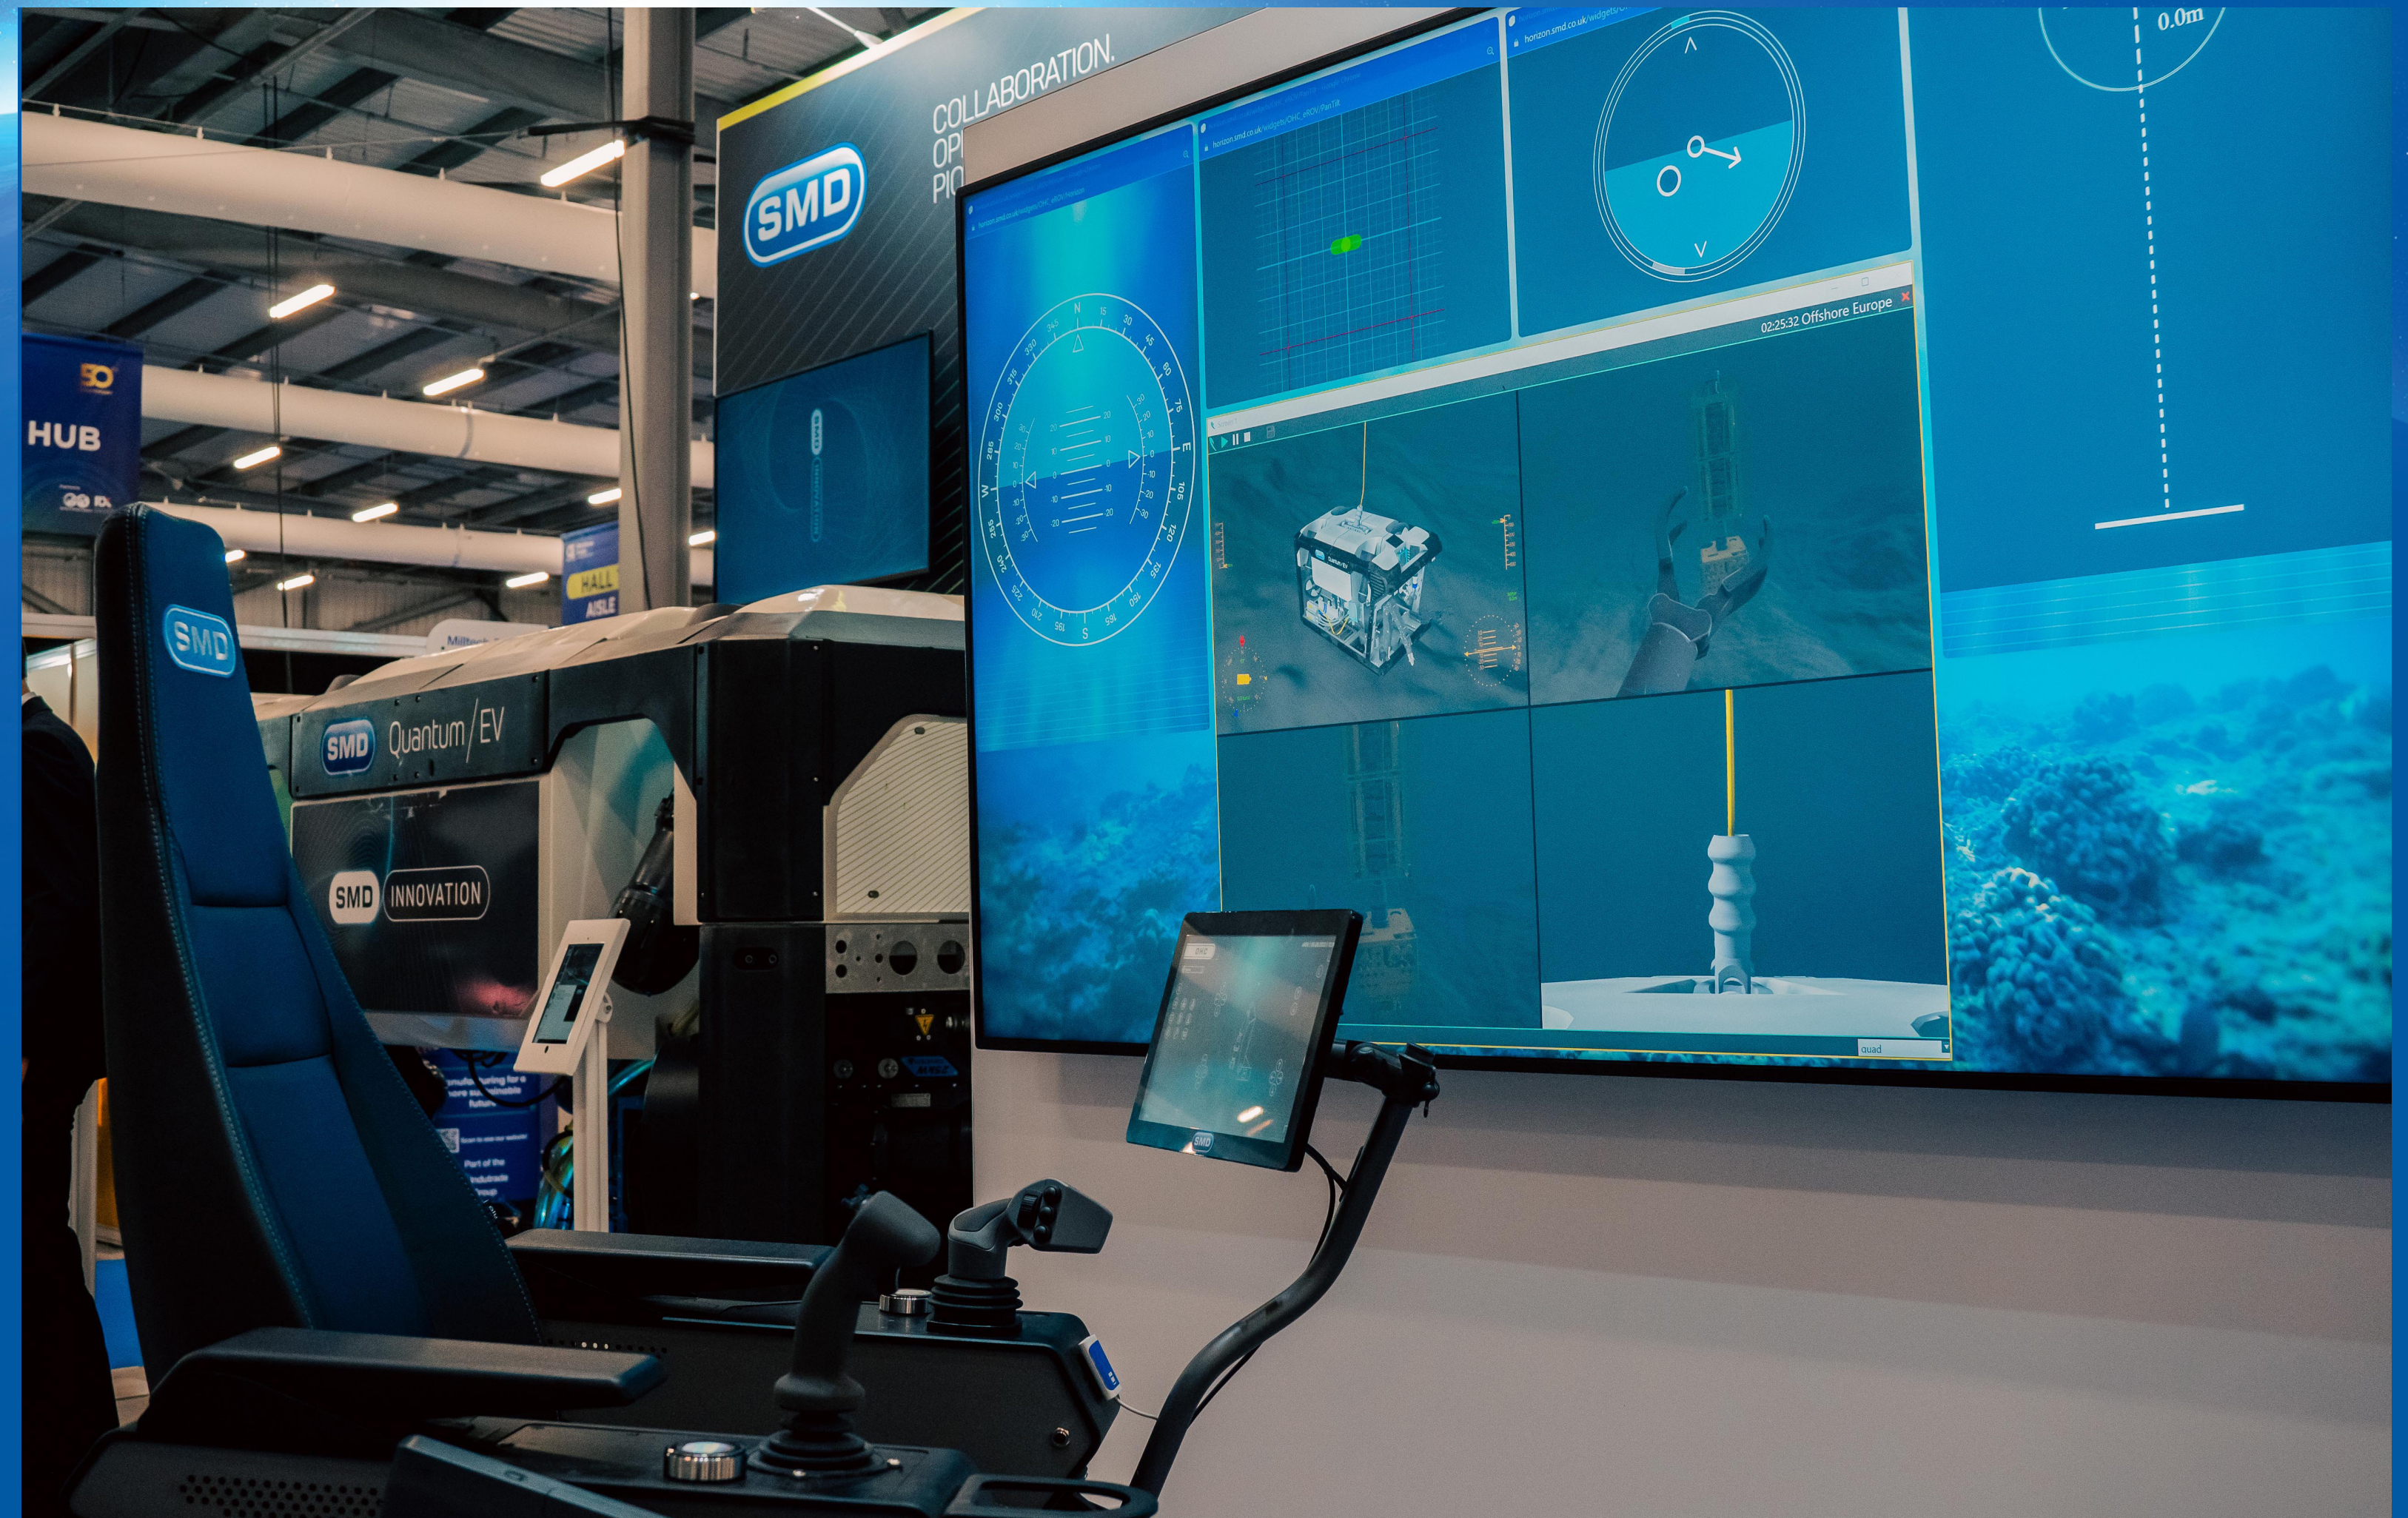

SMD HORIZON

Fleet managers and clients can view and analyse the latest data and detect issues before they occur.

Pilots can connect to a simulator, to practice tricky situations or improve their skills.

Supervisors can monitor multiple missions and multiple operators in real time.

Dual control enabling piloting from multiple locations, and split shift-working across time zones.

Experts can offer advice and perform data analytics over the full mission.

SMD can use vehicle data from real missions to innovate for the future

Agnostic controls will work with a range of vehicle types.

Data at your fingertips.
